International Solar Alliance (ISA) is conceived as a coalition of solar resource rich countries to address their special energy needs and will provide a platform to collaborate on addressing the identified gaps through a common, agreed approach. Main objectives of ISA are to promote solar technologies and investment in the solar sector and programmes to promote solar applications.

It is known that in member countries several initiatives will be required to promote Solar Projects. However, as a first step towards it, ISA believes that setting up demonstration projects in key Government Buildings will help all stakeholders (i.e. policy makers, general populace, utility etc.) to appreciate benefits of Rooftop Solar Projects and also to prepare roadmap for the same.
