## Cost of preparation of quotation

ISA shall not be responsible for any costs associated with a Supplier’s preparation and submission of a quotation, regardless of the outcome or the manner of conducting the selection process.

## Supplier Code of Conduct, Fraud, Corruption, etc.

All prospective suppliers must read the United Nations Supplier Code of Conduct and acknowledge that it provides the minimum standards expected of suppliers to the ISA. Moreover, ISA strictly enforces a policy of zero tolerance on proscribed practices, including fraud, corruption, collusion, unethical or unprofessional practices, and obstruction of ISA vendors and requires all bidders/vendors to observe the highest standard of ethics during the procurement process and contract implementation.
| **Gifts and Hospitality** | Bidders/vendors shall not offer gifts or hospitality of any kind to ISA staff members including recreational trips to sporting or cultural events, theme parks or offers of holidays, transportation, or invitations to extravagant lunches, dinners or similar. In pursuance of this policy, ISA: (a) Shall reject a bid if it determines that the selected bidder has engaged in any corrupt or fraudulent practices in competing for the contract in question; (b) Shall declare a vendor ineligible, either indefinitely or for a stated period, to be awarded a contract if at any time it determines that the vendor has engaged in any corrupt or fraudulent practices in competing for, or in executing an ISA contract. |
| **Conflict of Interest** | ISA requires every prospective Supplier to avoid and prevent conflicts of interest, by disclosing to ISA if you, or any of your affiliates or personnel, were involved in the preparation of the requirements, design, specifications, cost estimates, and other information used in this RFQ. Bidders shall strictly avoid conflicts with other assignments or their own interests, and act without consideration for future work. Bidders found to have a conflict of interest shall be disqualified.  

Bidders must disclose in their Bid their knowledge of the following: a) If the owners, part- owners, officers, directors, controlling shareholders, of the bidding entity or key personnel who are family members of ISA staff involved in the procurement functions and/or the Government of the country or any Implementing Partner receiving goods and/or services under this RFQ.  

The eligibility of Bidders that are wholly or partly owned by the Government shall be subject to ISA's further evaluation and review of various factors such as being registered, operated, and managed as an independent business entity, the extent of Government ownership/share, receipt of subsidies, mandate and access to information in relation to this RFQ, among others. Conditions that may lead to undue advantage against other Bidders may result in the eventual rejection of the Bid. |
| **General Conditions of Contract** | Any Purchase Order or contract that will be issued as a result of this RFQ shall be subject to the General Conditions of Contract Select the applicable GTC:  

☐ General Terms and Conditions / Special Conditions for Contract  
☐ General Terms and Conditions for de minimis contracts (services only, less than $50,000)  

☐ Cancellation of PO/Contract if the delivery/completion is delayed by 10 days |
| **Special Conditions of Contract** | A vendor who will be engaged by ISA may not be suspended, debarred, or otherwise identified as ineligible by any UN Organization or the World Bank Group or any other international Organization. Vendors are therefore required to disclose to ISA whether they are subject to any sanction or temporary suspension imposed by these organizations. Failure to do so may result in termination of any contract or PO subsequently issued to the vendor by ISA.  

It is the Bidder’s responsibility to ensure that its employees, joint venture members, subcontractors, service providers, suppliers and/or their employees meet the eligibility requirements as established by ISA. |

ANNEX 1: SCHEDULE OF REQUIREMENTS Terms of Reference:

BI Tool needs to directly connect, extract, and transform all the required data from data source provided by International Solar Alliance (ISA).

• Standardized data format to be created from existing data files as per business requirements with certain percentage of buffer column to incorporate future data addition from ISA
• Interactive and Informative Dashboard to be developed and made live on the Tableau Online portal
• Business Processes to be incorporated in the dashboard:
  Country (ratified/signed), Programme details, Project details, Fund (Granted/Sanctioned), Capacity (Proposed/Approved), Program-wise Country highlights, Country-wise Program highlights
• Features & Functionality to be incorporated in the dashboard:
  World Map with highlight on hovering each Country, Coloured based on Country ratified (green), signed (dark yellow), potential (peach) with basic information displayed such as NFP (National Focal Point) Name, Programs Active, Total Capacity Approved, Site Visits Done(count)/Status/Details
• Data Visualisation – enables the graphical representation of data in a variety of formats. These formats may include charts, graphs, maps, data art, infographics, and data dashboards. The tool will have interactive capabilities enabling business users to manipulate or drill into the underlying details. The tool should allow self-service data preparation and data discovery capabilities. It is envisaged that the tool will not require significant involvement from technical resources (i.e., internal IT department) to predefine data models upfront to enable analysis
• Enterprise Reporting – This is defined as a system that enables regular provision of information to decision-makers within the organisation. Enabling the creation, and distribution of ad-hoc queries, reports, and dashboards, based on pre-modelled data and predefined semantic layer. Scheduled reports to be generated periodically as per BI best standard practices
• User Level Permission/Access of the Dashboard to ISA staff
• User training to be provided to ISA staff on data input ways for the newer formats
• Dashboard to be either embedded into SharePoint or a link redirecting from ISA Website

The services required are as follows and detailed further below:

Project Delivery/Expertise

The supplier is expected to be responsible for project management and delivery. Providing both resources and a detailed project delivery plan, duration including dates, milestones, and details of the key personnel involved in the delivery of this project.

Also, ISA would require the developer to report at ISA Secretariat office location till the delivery of the dashboard or project completion.

Flexible licensing for software usage

It is anticipated that up to 100 users will require use of the software. User numbers are likely to change from one month to another and therefore it is assumed that licensing will provide the flexibility to both increase and decrease users and change the level of access available as per the requirement. It is anticipated that the pricing offered will be structured to enable any changes to be reflected within a given period.

The number of users would initially be relatively small. As dashboards and visualisations are
developed and as products are deployed the number of users would increase.

External users will need to be able to access a suite of dashboards (developed using this tool), that will be embedded on the ISA website.

**Internal users have been classified into two main segments:**

- **Creator/Admin** (supports the end-to-end workflow, inclusive of data prep/data integration and IT services – maintenance/support) – Up to 2 users
- **Viewer** (view and interact with dashboards/visualisations) – Up to 10 users

The figure mentioned above is indicative of the range and approximate mix of users across the organization requiring access after analysts have developed the initial suite of product. The tool should be able to manage up to 100 concurrent users.

All the licenses if required to be purchased to access the Dashboard per user, will be under the name of International Solar Alliance. Considering the dashboard to be of SaaS Model, ISA will have complete ownership of the data exchanged and residing on the server hosting the platform.

**Hands on training and training materials**

It is anticipated that the supplier will provide full training to our ICT service team to ensure the smooth operation of the software, enabling them to support the system. Training should include but not be limited to the installation of new releases, managing service desk requests, adding, deleting, and changing users’ access or user type and resolving errors and the recovery of data.

In addition, training will be required for end user within the organization, circa 8-14 staff mainly comprised of Analysts. It is expected that ‘hands on/on site’ training would be provided in addition to the provision of training materials for self-help (such as videos, podcasts, and up-to-date documentation). The supplier is expected to provide support, training and guidance to analysts to build a small suite of dashboards and visualisations (Including creation of semantic layers), ensuring capability is developed to manage the tool end to end.

This training is anticipated to be completed at the start of the contract. Note that if significant changes occur to the software during the term of the contract it is anticipated that sufficient training would be provided to staff to support those changes at a later stage.
