About ISA

The International Solar Alliance (ISA) is an action-oriented, member-driven, collaborative platform for increased deployment of solar energy technologies as a means for bringing energy access, ensuring energy security, and driving energy transition in its member countries. Launched by India & France in 2015 to facilitate energy access, security & transition, the ISA is creating a global market system to tap the benefits of solar power by promoting clean energy applications. With 101 Member countries in the global collective, the ISA is working towards creating a multi-stakeholder ecosystem where sovereign nations, multilateral organizations, industry, policymakers and innovators are coming together to promote the common and shared goal of meeting energy demands of a secure and sustainable world.
