Section 5. Terms of Reference

1. About International Solar Alliance (ISA)

The International Solar Alliance (ISA) was conceived as a coalition of solar-resource-rich countries (which lie either completely or partly between the Tropic of Cancer and the Tropic of Capricorn) to address their special energy needs. The ISA will provide a dedicated platform for cooperation among solar-resource-rich countries, through which the global community, including governments, bilateral and multilateral organizations, corporates, industry, and other stakeholders, can contribute to help achieve the common goal of increasing the use and quality of solar energy in meeting energy needs of prospective ISA member countries in a safe, convenient, affordable, equitable and sustainable manner.

The ISA has been conceived as an action-oriented, member-driven, collaborative platform for increased deployment of solar energy technologies to enhance energy security and sustainable development, and to improve access to energy in developing member countries. The ISA has 122 sun-belt countries, that lie between the two tropics, as its prospective member countries and currently boasts a membership of 85 countries. The ISA will not duplicate or replicate the efforts that others (like International Renewable Energy Agency (IRENA), Renewable Energy and Energy Efficiency Partnership (REEEP), International Energy Agency (IEA), Renewable Energy Policy Network for the 21st Century (REN21), United Nations bodies, bilateral organizations etc.) are currently engaged in, but will establish networks and develop synergies with them and supplement their efforts in a sustainable and focused manner.

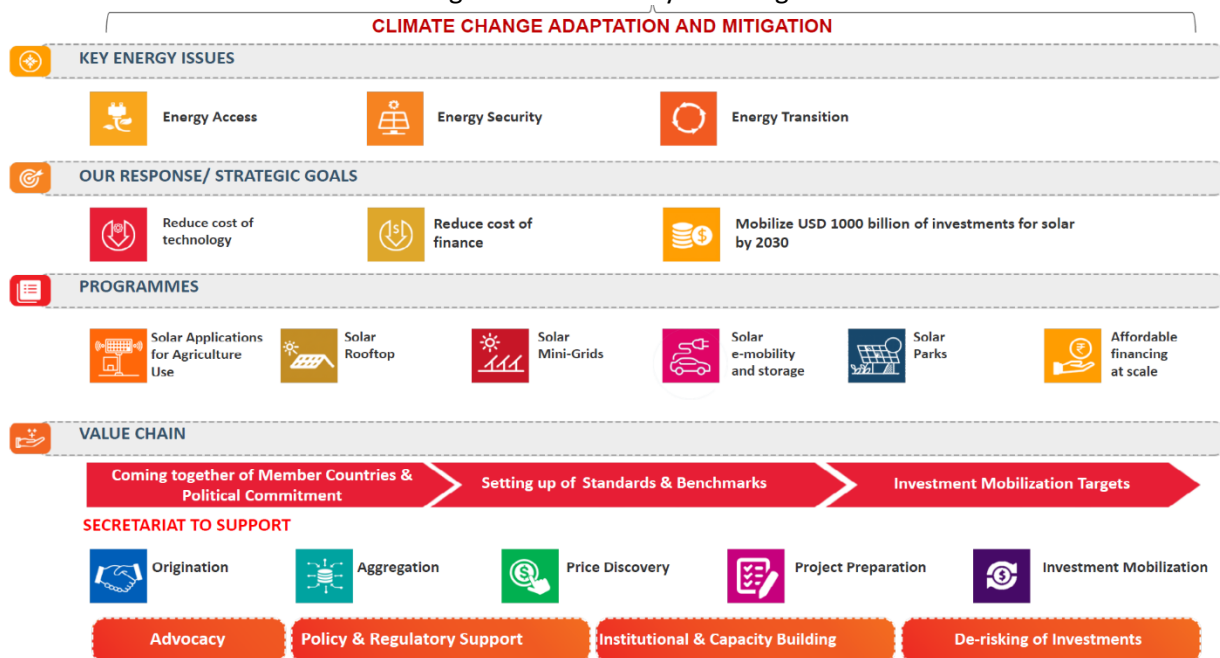

As guided by the Framework Agreement of the ISA, the interests and objectives of the ISA are as follows:

- To collectively address key common challenges to scale up solar energy applications in line with their needs;
- To mobilize investments of more than USD 1,000 billion by 2030;
- To take coordinated action through programmes and activities launched on a voluntary basis, aimed at better harmonization, aggregation of demand, risk and resources, for promoting solar finance, solar technologies, innovation, R&D, capacity building etc.;
- Reduce the cost of finance to increase investments in solar energy in member countries by promoting innovative financial mechanisms and mobilizing finance from Institutions;
- Scale up applications of solar technologies in member countries, and
- Facilitate collaborative research and development (R&D) activities in solar energy technologies among member countries; and
- Promote a common cyber platform for networking, cooperation and exchange of ideas among member countries.

2. Background

The ISA works across three key energy issues – energy access, energy security, and energy transition. The organization's three key objectives are to reduce the cost of technology, reduce the cost of finance, and mobilize USD 1000 billion of investments for solar by 2030. The ISA does this through its work in six program areas namely (i) Solar applications for agricultural use (ii) Solar rooftops (iii) Solar mini-grids (iv) solar E-mobility and storage (v) Solar parks (vi) affordable financing at scale. The figure below provides ISA's Theory of Change.

Figure 1 ISA's Theory of Change

Across these programs, the ISA plays the role of an accelerator, a facilitator, an enabler and an incubator. Its roles across these categories are as below.

- **Accelerator:** The ISA acts as a demand aggregator that identifies innovative and scalable solar solutions and programs. It partners with organizations to foster collaboration in the solar sector.
- **Facilitator:** The ISA strengthens the national determined contributions (NDCs) of member countries, fosters partnerships with funding agencies, prepares globally recognized solar standards and provides a forum for sharing information and best practices.
- **Enabler:** The ISA creates capacity across member countries – including creating awareness, supporting local R&D centers and supporting member countries through global and regional analytics.
- **Incubator:** The ISA incubates new financial products and business products that will enable the ecosystem.

ISA's funding requirement

The ISA is currently supported by a General Grant, interest on a Corpus Fund and general funds. On the current trajectory, the ISA will have a deficit by 2022 assuming a projected increase in expenditure of 10% year-on-year. Moreover, the current commitment to the General Grant will cease after 2020. Therefore, the ISA needs to raise funds to ensure financial sustainability. The second Assembly of the ISA mandated the President and the Co-President to make efforts to mobilise financial resources for programme implementation and projects.

The ISA aims to raise \$100 million by the third Assembly (14th-16 Oct 2020) for funding programmes and project implementation for the next three years, demonstrated in Figure 2 below. To meet this target, the ISA has set provisional funding targets from potential sources such as current members, prospective members, corporate contributors, foundations, multilateral financing institutes and UN agencies.

Figure 2 Funding requirement of ISA to implement programs in the next 3 years

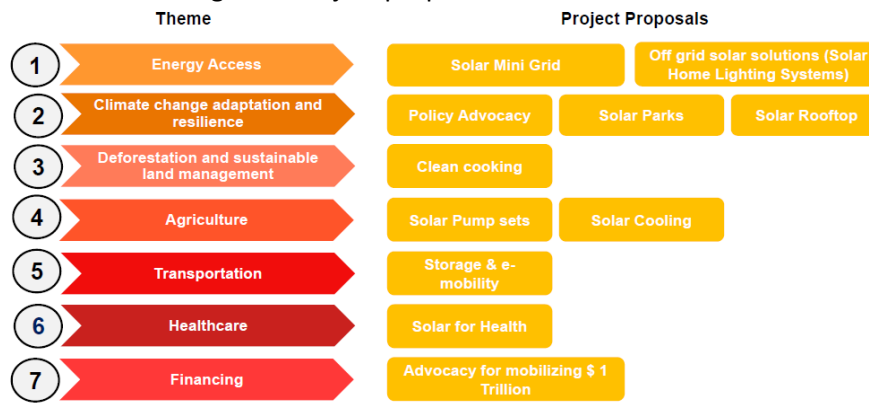

Details of each of these requirements are given below:

1. Funding for specific projects (\$70 million)

The ISA plans to implement 12 projects across 7 themes – energy access, climate change adaptation and resilience, deforestation and sustainable land management, agriculture, transportation, healthcare and financing. A mapping of project proposals to these themes can be seen in Figure 3 below.

Figure 3 Project proposals across 7 themes

2. Enhancement of Corpus Fund (\$20 million)

Interest on the Corpus Fund is utilized to meet the Secretariat personnel cost and management support costs in the next three years. Mobilizing these funds will augment ISA’s financial sustainability in the long run.

3. Management Support Funding (\$10 million)

In addition to the interest accrued on Corpus Fund, the ISA requires an additional fund to meet Secretariat personnel cost and management support costs in the next three years.

3. Scope of work

The ISA needs to raise funds to achieve its global mandate. The ISA is currently funded by general grants, interest on corpus fund and general funds. Funds can be raised through voluntary contributions from member countries, partner organisations and UN agencies, corporate contributors, multilateral financing institutions and foundations, and targeted contributions from other countries to enhance the international charter of the ISA. In this context, the ISA aims to mobilize \$100 million by the pledging dinner on 14th Oct 2020 to fund and implement programmes, projects and the organisation for the next three years.

Bearing this in mind, the ISA seeks specific consulting support in three areas:

1. Support in finalizing and implementing the fundraising strategy for ISA, as well as ongoing support for ISA fundraising efforts. Bidder will be required to support the Secretariat:
 - in elaborating and finalizing the fundraising strategy for ISA, including identifying and targeting potential sources of funding, developing an outreach plan and associated impact narrative, and refining the fundraising strategy based on lessons learned and progress made
 - in developing project proposals, under the guidance of Global Advisor (Resource Mobilization) and relevant members of the ISA leadership team, and based on ISA-developed concept notes on the 12/13 topics above, for seeking USD 70 million from potential contributors
 - in finalizing the supporting collateral for fundraising, such as programming, pitch documents, and success stories, under the guidance of Global Advisor (Resource Mobilization) and relevant members of the ISA leadership team
 - in actively assisting with fundraising efforts and securing USD 100 million in pledges and commitments.
2. Monitoring and Evaluation (M&E) framework. Bidders will be required to design a robust M&E framework for programmes, projects and the organization.
3. Review the current strategy and operations of the ISA and recommend practical changes. Bidders will be required to refine the ISA's Theory of Change, identify, and articulate the impact created to date. In addition, bidders will be asked to provide recommendations on gaps in internal capacity on operations and implementation support to the ISA.

The engagement will run from the start of June 2020 to the end of November 2020 and Bidders should make recommendations on the phasing of support to achieve the three objectives above. In addition, Bidders should explain how they will adapt their approach considering COVID-19 given uncertainty around the emerging situation.

Travel component:

This assignment may involve travel to ISA member countries. The travel will be pre-approved by ISA management and reimbursement/payment of Air-tickets & Daily Substance Allowance (DSA) will be undertaken as per prevailing ISA travel policy (Economic class travel, most direct route etc).

Facilities to be provided by ISA

ISA will brief the shortlisted organization on the requirements, each unit will support the shortlisted organization in understanding the workflow of each process.

Deliverables

The Deliverables of the assignment will be as per Terms of Reference in section 5.
