ANNEX 1: TERMS OF REFERENCE

1. BACKGROUND

The International Solar Alliance (ISA) is an inter-governmental organization headquartered in Gurgaon, India. Currently 112 Countries have signed ISA Framework Agreement of which 92 Countries have ratified the Agreement. The membership is open to all the UN recognized Countries. The vision and mission of the ISA is to provide a dedicated platform for cooperation among countries where the global community, including bilateral and multilateral organizations, corporates, industry, and other stakeholders, can make a positive contribution to assist and help achieve the common goals of increasing the use of solar energy in meeting energy needs of ISA Member Countries in a safe, convenient, affordable, equitable and sustainable manner. For further information about ISA, kindly refer ISA website- https://isolaralliance.org/

A. Project Title
Preparation of at least 8 different case studies to serve as exemplars of successful and challenging investments in solar projects, (emphasizing mini-grids development) in Africa.

B. Project Description
Global investments in solar reportedly crossed the USD ~220 billion mark in 2021, witnessing an increase of 18% from 2020 levels. Regionally, solar investments have been skewed in favor of the Asia and Pacific, and Europe and North America regions. While Middle East, Africa, Latin America, and the Caribbean contributed to a meagre ~8% of overall solar investments. The skewness of the investments can be witnessed by the fact that Africa, which is home to 17% of the world’s population contributes to less than 2% of global solar installed capacity despite having the richest solar resources in the world.

ISA recognizing the lack of investment in Africa and is looking to analyze successful and unsuccessful investment scenarios through case studies in various countries. Each case study would cover, including but not limited to the following:

1. Business Models
2. Financing Models
3. Regulatory and policy environment
4. Technical feasibility
5. Government support and actions
6. Methods for finance mobilization
7. Economic and Political Factor
8. And other crucial factors required for mini-grid development in Africa.

The primary objective of this project is to provide examples to ISA member countries of successful models that are sustainable and have mobilized investments for solar projects; and draw learnings from the unsuccessful ones. The case studies should aid member countries in examining their respective regulations and policies to identify possible means of attracting sustainable mini-grid investments in their country.

C. Scope of Work
a) Develop a strategy for preparation of at least eight (8) case studies from not less than 4 countries across the African region with the approval of the ISA.

b) Research and develop the case studies highlighting various investment impacting factors, including but not limited to, Business Models, Financing Models, Regulatory and policy, Technical feasibility, Government support and actions, Methods for finance mobilization, Economic and Political Economy etc.

b) Prepare an executive summary, providing details of the investment case studies conducted, the analysis and observations based on the case studies and the recommendations/suggestions.

d) The successful bidder will work closely with ISA officials and any other officials ISA may require the bidder to work with.

e) The successful bidder may have to make presentations of the work done to the officials of ISA.
D. Expected Outputs

E. Reporting

a) The successful bidder will be directly responsible to, reporting to, seeking approval/acceptance of output from legal unit.

b) The successful bidder will provide an update on the progress on a weekly basis through an email and report any hurdles in meeting the scope of work as soon as possible. In addition, the successful bidder will provide a detailed progress report every fortnight outlining the progress made against the timeline.

F. Duration of the Work

The duration of the contract will be 10 weeks from the contract start date (tentatively, 10th July 2023). The successful bidder is expected to dedicate adequate time required to meet the timeline provided while ensuring the quality of the deliverable is satisfactory to ISA.

G. Duty Station

Remote working. However, upon request from ISA, the successful bidder may have to travel to the ISA Headquarters (Gurgaon, India).
